Claims 6 to 11 and 15 to 29 are pending in the instant application. Claims 1 to 5 and 12 to 14 were canceled and claims 23 to 29 have been added as requested by Applicant in the correspondence of 07 December of 2001.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 6 to 11, 20, 23, 24 and 28, drawn to a recombinant leptin receptor, classified in class 530, subclass 350.
- II. Claims 15, 16, 25 and 26, drawn to an antibody to a leptin receptor, classified in class 530, subclass 388.22.
- III. Claims 17, 18 and 21, drawn to a ligand, classified in class 530, subclass 399.
- IV. Claims 19 and 27, drawn to a binding assay, classified in class 435, subclass 7.21.
- V. Claims 22 and 29, drawn to a method of treatment by administering a receptor protein, classified in class 514, subclass 2.

The inventions are distinct, each from the other because of the following reasons:

The receptor protein of invention I, the antibody of invention II and the ligand of invention III are three chemically distinct and structurally unrelated compounds each of which can be made and used without the others. These three compounds lack unity of invention because they do not have a common utility that is based upon a shared feature or combination of features lacking from the prior art.

Invention I is related to each of inventions IV and V as product and process of use. The inventions can be shown to be distinct if either or both of the following can be

shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the analytical method of invention IV and the method of treatment that is invention V are two materially different methods of using the protein of invention I because they achieve different objectives through different method steps.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
